SUMMARY

Full Stack Developer with 1+ year of hands-on, project-based experience building production-level web applications using the MERN stack. Currently pursuing a Bachelor's in Computer Science at the University of Karachi (2024–present). Passionate about creating scalable, full-stack solutions with clean architecture, AI integrations, and polished user interfaces. Adept at working across the entire development lifecycle from database schema design and REST API development to responsive, animated frontend experiences.

SKILLS

Languages & Frameworks: HTML, CSS, JavaScript, React.js, Node.js, Express.js

Database: MongoDB, Mongoose

Tools & Technologies: MERN Stack, REST APIs, JWT Auth, Google OAuth, Stripe, Socket.io

AI Integration: Google Gemini AI

Other: Git, GitHub, Framer Motion, Tailwind CSS, Chart.js, Postman

WORK EXPERIENCE

Full Stack Developer — Freelance / Project-Based 2024 – Present

1) Grand Bazaar E-Commerce Platform (MERN Stack)

- Architected a multi-role e-commerce platform for Buyers, Admins, and Super Admin with role-based access control, Google OAuth, and JWT authentication.
- Built a real-time order tracking system with buyer-rider chat and a multi-step Stripe + COD checkout flow.
- Developed Admin and Super Admin dashboards covering product CRUD, order management, sales graphs, best-selling trends, and user/product approval controls.

2) AI-Powered Interview Preparation Platform (MERN + Gemini API)

- Built an AI interview simulator using Gemini AI for context-aware question generation, answer evaluation, and resume-based personalization via PDF parsing.
- Implemented voice-to-text via Web Speech API with real-time confidence and emotion scoring, plus a live coding mode using Monaco Editor and Judge0 API.
- Developed a performance analytics dashboard with Radar and Line charts tracking communication, technical ability, and confidence scores across sessions.

3) SpendSense AI Expense Management System (MERN + Google Gemini AI)

- Integrated Google Gemini 1.5 Flash for smart auto-categorization, natural language expense entry, AI budget advisory, weekly spending insights, and anomaly detection.
- Implemented secure JWT authentication with refresh token rotation, httpOnly cookies, and silent Axios interceptor-based token refresh.
- Built an analytics dashboard with KPI cards, drill-down donut charts, 12-month trend lines, budget vs. actual tracking, PDF/CSV export, and production-grade security.

EDUCATION

Bachelor of Science in Computer Science 2024 – Present

University of Karachi

Intermediate Pre-Engineering

DJ Science College, Karachi
